ABSTRACT

A fabric for water sports garment includes a foam rubber layer, a first layer and a second layer. The foam rubber layer has a first surface and a second surface opposite to the first surface. The first layer is laminated on the first surface of the foam rubber layer, and the first layer has a plurality of types of multifilament yarns, and each of the multifilament yarns is 5-20 denier. The second layer is laminated on the second surface of the foam rubber layer.
